Extensive Inventory • Quick Delivery • Same Day Shipping

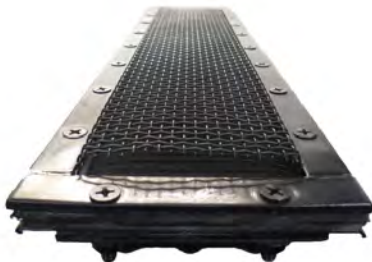

Infrared Gas Burners, Heaters, Gas Train, Scrubber, Controls, Discharge Bags, Conveyor Belts, Sprockets, Shafts, Hopper & Extruder, and more!

INFRARED GAS BURNERS & HEATERS

Infrared Gas Burners and Heaters

M.W. Watermark® can supply virtually any replacement part for your sludge dryer's heating system, including infrared gas burners for all models of similar continuous dryers.

M.W. Watermark's Infrared Gas Burners are designed for efficient heating and long service life. We maintain a stock of other heating system parts like spark igniters, flame rods, thermocouples, air filters and many more for quick, easy replacement.

ADDITIONAL REPLACEMENT PARTS

Conveyor Belts, Sprockets, Shafts, Hopper and Extruder

M.W. Watermark carries a large stock of stainless steel conveyor belts as well as custom drive sprockets, gearboxes, bearings, and gears.

Replacement custom shafts, weldments and most any other fabricated parts for sludge dryers are available.

A complete line of extruder paddles, debridger paddles, hub arm plates (and backers) and wobble arm assemblies for almost any model of continuous sludge drying are kept in-stock.

Gas Train, Scrubber, Controls, Discharge Bags

M.W. Watermark carries original motors, DC motor control boards, timers, switches and electrical components.

Many sludge dryers use a wet scrubber to clean exhausting air. Our replacement parts to help keep you in compliance with air emission requirements.

For sludge dryers that discharge into sludge bags, we offer a complete line at competitive prices.

M.W. Watermark's top priority is customer satisfaction. We keep an extensive inventory of parts to ensure quick delivery and easy installation. Many items can be shipped the same day they are ordered.

The M.W. Watermark team has decades of experience servicing water & wastewater treatment equipment, ensuring you'll get the highest quality products and service at the right price.

Sales and Service

The M.W. Watermark inside sales team are experienced service professionals who are available to visit job sites to trouble-shoot, repair equipment, and train staff to ensure equipment is running at maximum efficiency. They can also be reached to help solve maintenance issues, trouble-shoot, and answer questions via phone or e-mail.
