

AUTOMATIC FILTER CLOTH WASHER

M.W. Watermark automatic plate shifters can also be built with an automated filter cloth washer. Our design is the most compact and efficient on the market. It takes up a minimal amount of space above and around the filter press. It is designed with a variable speed drive so the cloth washer can run fast for a heavy rinse or more slowly for very soiled cloths. The washer can run up to 50 HP (1500 psi) and is outfitted with 26 nozzles that clean all the way to the edge of the filter plate. We can also retrofit this design.
